Text of Blast Call Notification to all resident families and employees via VoiceFriend.

Hello,

It's Bill Bogdanovich, President/CEO at Broad Reach Healthcare.

Here's an update since yesterday's announcement of our COVID positive resident.

The resident was promptly moved into our COVID treatment space in the rehabilitation clinic, and is being cared for by a designated team that is only working there.

Testing was immediately initiated for all Stage Harbor residents. Residents and families will be individually notified of those results as they come in. Testing of staff is our next priority. This begins with Stage Harbor staff. We're using the site at Cape Cod Community College, and we continue exploring all other avenues to achieve the safest and most reliable process, as many of the state's initiatives to date have been fraught with issues.

Seventy-eight patients and fifteen staff members have been tested so far, with the largest group of patient and resident samples taken late yesterday. Only two new results have come in today, and both of them were negative.

You'll be hearing from us more frequently now, and we encourage you to also use the dedicated information line for your general questions on COVID19. It is 508.945.1611 x 378. You will be asked to leave your name and a number for a callback within the next business day. You may also submit an inquiry by email to info@broadreachhealth.org. These updates are also posted on the COVID-19 information link of broadreachhealth.org.

Thank you.
