# Pending Results	14	20	26	0	60	
Testing Triggers	Appointment	Baseline Test	DC Planning	Symptom		
	6	251	11	58		

**Patient/Resident Testing this week:** 115 Liberty Commons residents were tested – 0 based on symptoms; 1 for medical appointment or discharge screening, and the remainder per protocol because of a staff positive in surveillance protocol. Of the 114 in the new baseline group, negative results are back on 70. All of the others are pending. There are no positives. Results of others that were previously pending have returned (negative).

**Employee Testing:** Our first round of the “30%” surveillance testing cycle began on 7/27, with 82 staff tested. 81 of them resulted negative; 1 Liberty Commons employee resulted positive. The positive triggered us to a cadence of 90% weekly (along with the baseline of a new patient/resident baseline, which was immediately initiated. Through 8/5, 174 staff have been tested. 129 results have returned negative; 45 are pending. There are no further positives in this new surveillance round.

The employee who tested positive immediately quarantined. Repeat tests were initiated, with negative results on both of those repeats.

There are no symptom-based employee tests pending.

**COVID Deaths\*** = 0 (employees or residents)  
\* CDC Requirement as of May 2020

**PPE:**  
*Adequate supplies on hand and with appropriate orders pending to replenish.*

**Operational/Staffing Impacts/Limitations:**  
*None at this time.*

Since May 8, 2020 (when the federal government issued reporting requirements), we have had:

- **No** confirmed cases of COVID-19, **and**
- **No** clusters of three or more residents/staff with new onset of respiratory symptoms within 72 hours of each other.

It has been 100 days since a new resident and 6 days since a staff member at Liberty Commons has tested positive.

No Victorian residents or staff member have tested positive since testing started in March.

**Additionally:**

1. **Surveillance Testing:** Liberty Commons will remain at the enhanced cadence of 90% minimum threshold for staff testing for another reporting period (which ends on 8/13). If there are no positive results, we will be on the path to return to “mask/eyeprotection” PPE level, reintroduce communal dining and activities, as well as outside 1:1 visits, all of which were suspended because of the 1 staff positive result.
2. **Inpatient Rehab Therapy:** We continue working to prepare the rehab therapy space for return to use; the therapy team has moved their workspace back to that space. Patient treatment will not resume until two cycles of surveillance testing is complete with no positive results.
3. **Assisted Living→ DPH ■ EOEA ■ Local BOH:** The Executive Office of Elder Affairs has advised all assisted living residences that a local health department directive requiring residents to quarantine is necessary when quarantine is imposed, even if other regulatory directives (e.g. DPH) specify that quarantine is indicated. While we have not had residents refuse to quarantine, we feel it would be prudent to have this directive on record from the town and have submitted that request.
